UNIVERSITY LIBRARY IN BELGRADE IS  
CHANGING ITS ROLE, BECOMING THE EDU-  
CATIONAL CENTER OF THE  
UNIVERSITY OF BELGRADE.

The University librarians are aware of changes that occurred in research communication. Through Serbian research libraries consortium (KoBSON), we now have access to 38.000 full text electronic journals and 40.000 electronic books. In 2003 Consortium started promoting the usage of the electronic journals for university and institute researchers. As one of the KoBSON founders, librarians from University Library gave more than 100

presentations with more than 1.500 participants. Since 2007 KoBSON education project for PhD students is ongoing. Besides e-services search, we introduce PhD students to citation databases, bibliometric evaluation of scientific performance, copyright matters and open access resources. We started educating the graduating high school students at the end of 2009. Graduates are educated to search the electronic catalog and e-services.
